23. Explain the different aspects of discourse analysis with examples.
24. Expound the theories in second language acquisition.
25. Transcribe the following passage :

Our history is the account of hysterical racial aversion. Presumption of the suzerainty of fair skin over the dark has led to the painful pages of slavery and savagery. All colours have a role to play. If leaves are yellow, then the plant must be suffering from a disorder. A balanced food will have the correct combination of all colours. A judicious mix of vegetables in green, orange, red, yellow and white will strike a healthy balance. A colourful food will lead to a colourful life. Similarly a balanced life is contributed by balancing the mind. Vision should be rich without colour blindness but 'coloured vision' is awful. Our failure to appreciate the beauty of each and every creation in the universe has made us grope in a lack lustre world and Our colours have been restrained and confined to the television sets we have. More love, attention, empathy and understanding towards everything that we encounter can make us come out with flying Colours.
